New Tile and Quest Map Symbol

Bottomless Pit Bridge

New Trap

Falling Block: When a character player moves through a square containing a falling block symbol, a block will fall. It will land into the adjacent square marked with the arrow on the Quest map, blocking the way. Any character or monster in the square into which the block falls must roll three combat dice. The victim must lose one Body point for each skull rolled, and then move to an adjacent unoccupied square. If the victim cannot move to an adjacent square, he is eliminated by the falling block.
