One night while relaxing at the Orc's Head Inn a large, jolly fellow approaches and offers 100 gold coins for the rescue of one of his helpers. This poor fellow had been touring the lands visiting all the boys and girls when a warband of cruel Orcs

descended...clubbing him over the head and making off with his stash of chocolate gold coins...grab your weapons...Santa's helper needs you!

NOTES:

- A** Each treasure chest contains 3 chocolate gold coins.

Searching for Treasure

If you discover gold, gems or treasure when searching you instead recover 2 chocolate gold coins.

Finding Santa's Helper

When Santa's Helper is found, an alarm sounds. Place ALL remaining monsters, doors and furniture on the board. All doors are now open. Santa's Helper should be moved by the player who opened the secret door. When that player takes their turn they also roll one die to move Santa's Helper. He must be moved back to the stair tile to escape.

Santa's Helper will not attack, he's too jolly for that, but if he is attacked he may roll two dice for defense. Santa's Helper has three Body Points left.
